Comment

All I did was added this line to interface.php

```
if (strlen ($rackData['comment']))
    //echo "<tr><th width='50%' class=tdright>Comment:</th><td class=tdleft>${rackData['comment']}</td></tr>\n";
echo '</table>';
echo '<iframe width=100% height=600 frameborder=0 src=' . ($rackData['comment']) . '></iframe>';
finishPortlet();
```
